### **Ormond Medical Arts Now a Complete Health Provider**

*Physicians, staff, location remain the same*

**ORMOND BEACH, Fla., June 15, 2019** – Ormond Medical Arts in Ormond Beach has become one of the first locations of the Complete Health primary care group. The practice located at 77 W. Granada Blvd. will continue to provide medical care as it has done for more than 45 years. Founder James Shoemaker, D.O., will continue with the practice with his existing team and staff.

Complete Health is a physician-led independent primary care group with additional locations in Volusia County. The group offers patients the highest quality health care option and focuses on providing personalized health care coupled with service convenience. Becoming part of Complete Health enables the practice to better serve the entire community and continue to provide family health care.

“We are proud to become a Complete Health practice,” said Dr. Shoemaker. “We look forward to continuing our care for our patients while expanding our services and team.”

Ormond Medical Arts provides specialized and expanded primary care services including on-site lab services, diagnostic imaging and dedicated clinical research. In addition, it recently opened its Patient Engagement Center, an on-site center that offers health and wellness programming, education and activities for its patients.

Ormond Medical Arts and Complete Health provide walk-in services, expanded operating hours and special programs for seniors. As a Complete Health provider, Ormond Medical Arts will continue to expand its services, team, and physician base to meet the growing needs of the community.

*Complete Health is a physician-centric, professionally managed, technology-enabled primary care group delivering excellent quality support services and patient health outcomes. The group is based in Florida with practices in Volusia County and growth plans across Central Florida and the Southeastern United States. Complete Health builds on existing practices to embrace value-based care concepts, reduce physician administrative burden, and focus on patient care and quality outcomes – all while lowering the total cost of care.*
